Re:

Public Notice DA 05-506, released February 28, 2005

Report No. AUC-05-81-C

Request for Removal from MX Group 214 in LPTV Auction 81

Dear Madam Secretary:

On behalf of our client, Federated Rural Electric Association ("FREA"), this is to request that its application (File No. BMJPTTL-20000821AHA) for Channel 45, Jackson, Minnesota (the "Application"), be removed from MX Group 214 in Low Power Television Auction 81. In support hereof, the following is shown:

FREA's Application is among two applicants identified in MX Group 214 in Attachment A to Report No. AUC-05-81-C, Public Notice DA 05-506, released February 28, 2005. However, on August 23, 2001, FREA timely filed an amendment to the Application (the "Amendment") which was designed to remove FREA's Application from Auction 81. Therein, FREA demonstrated that its proposed facilities would not cause interference to any other proposed facility in its MX Group (which, at that time, was Group No. M286). In addition, FREA committed to accepting interference from any application filed on or before August 31, 2000.

Undersigned counsel has no knowledge of any disposition of FREA's Amendment by the Commission's staff. Accordingly, this is to request that FREA's Amendment be reviewed and processed, and that in light of the Amendment, FREA's Application be removed from Auction 81 and be processed as a singleton.

Newark

<sup>&</sup>lt;sup>1</sup> A date-stamped copy of FREA's August 23, 2001 Amendment is attached hereto for the staff's reference.

AUG 2 3 2001

PENNIAL COMMUNICATIONS COMMISSION OFFICE OF THE SECRETARY

Dear Ms. Salas:

On behalf of our client, Federated Rural Electric Association ("FREA"), licensee of Low Power Television Station K45EH, Jackson, Minnesota, I submit herewith an original and four copies of an amendment to FREA's above-referenced pending application for major modification of the facilities of K45EH.

FREA's application was listed among the mutually exclusive applications in MX Group M286 in Attachment A to Public Notice DA 01-1289, released May 25, 2001. However, as the attached amendment provides, FREA will accept interference from any other LPTV application that was filed on or before August 31, 2000. In addition, the amendment demonstrates that FREA's proposed facility will not cause interference to any other facility listed in MX Group M286. Accordingly, it is respectfully requested that FREA's application be removed from MX Group M286 and granted.

Should there be any questions concerning this matter, please contact the undersigned.

Sincerely,

Shelley Sadowsky

# ENGINEERING STATEMENT IN SUPPORT OF MINOR AMENDMENT TO APPLICATION FOR CONSTRUCTION PERMIT FEDERATED RURAL ELECTRIC ASSOCIATION CHANNEL 45+ JACKSON, MINNESOTA BNPTTL-20000821AHA

#### **AUGUST 2001**

The following engineering statement has been prepared on behalf of Federated Rural Electric Association ("FREA"), applicant for an improved LPTV facility at Jackson, Minnesota, as specified in FCC File Number BNPTTL-20000821AHA. FREA herein amends its application to accept interference from any application filed on/or before August 31, 2000 and demonstrates in <u>Table 1</u>, attached, that the proposed facility will cause no interference to any other facility in Group M286.

The proposed Channel 45+ K45EH operation, with the facilities specified in FCC Form 346, Section III now on file, has been prepared utilizing the allocation standards adopted in the Report and Order in MM Docket No. 00-10, "Establishment of a Class A Television Service" released April 4, 2000. Every effort has been made to protect other facilities on the basis of the contour overlap Rules. In these circumstances, the printout of stations studied (pages 3 and 4 of this Amendment) shows clear in the status column. In cases where the station studied was involved in contour overlap, an interference analysis using OET 69 type analysis procedures was employed. The status column indicates clean when the interference analysis method is used and confirmation of the lack of interference is made by comparing the total population column to the new population column to confirm that no reduction in population is associated with the proposal to any NTSC facility and that population in the interference to DTV facilities is less than the 0.5% de minimis rounding standard

OET 69 analysis was made in the cases described below and a waiver of the appropriate contour overlap or interference rules in herein requested as stipulated in paragraph 74 of the R & O.

A waiver of Section 74.707 is requested with regard to the following application:

Channel 45 W. Central Minn. ETV Comp. Inc. BNPTTL-20000831BSC

The waiver sought with regard to the above application is to utilize OET 69 analysis. In the unlikely event that operation of the proposed facilities results in actual impermissible interference, such interference will be remedied pursuant to Section 74.703(b) of the Commission's Rules.

Based on the data submitted herein, it is believed that the application is ready for grant and should be removed from MX Group M286.

The foregoing was prepared on behalf of Federated Rural Electric Association by Clarence M. Beverage of Communications Technologies, Inc., Marlton, New Jersey, whose qualifications are a matter of record with the Federal Communications Commission. The statements herein are true and correct of his own knowledge, except such statements made on information and belief, and as to these statements he believes them to be true and correct.
